  Institution: Concordia Higher Secondary School, Bargur – 635104.

Interest

- User experience design and usability, product / application design

Projects Handled

Project: ADTECH

Product Name: ADConceirge

Organisation: Cognizant Technology Solutions.

- This product will be a subscription based model and as such, it will allow our technology and services brand to extend its reach and visibility in the digital advertising market. It will be a strong complementary product to our existing services offering for advertising professionals.

- Single Unified platform
  The product will manage campaigns for multiple advertisers and from ad networks like LinkedIn, Facebook, Twitter and Google all at once, via an easy to use interface

- Optimization of campaign across networks
  The Product can also automate the campaign optimization activity based on predefined configurable Business Rules.

- ROI prediction and reporting.

Programming Language: Angular JS, HTML 5, CSS3, and Bootstrap.
Responsibilities:

- Designed the UI screens for creating campaign based on objective wise for Twitter network.

- Implemented one of the campaign creative – Slideshow feature in campaign creation for Facebook network.

- Worked on resolving the UI bugs in Facebook as well as Twitter network campaign creation flows. Worked on segregating files for Facebook, Twitter networks as per the objectives.

- Handled validating the mandatory fields in campaign creation process as per the campaign steps.

- Applied Style guide for all the campaign creation screens to maintain the responsive web designing.

Project: Polaris Wireless

Role: Angular JS Developer

Organisation: HCL Technologies

Client: CISCO

Polaris Wireless – Single Page Application developed using Angular JS, which provide web interface for network devices such as Cisco Catalyst 3850 Series Switches. Cisco IOS XE Denali provides network administrators with a single solution for monitoring, optimizing both wired and wireless devices.

Programming Language: Angular JS, Kendo, TDL, GreenFe and jasmine
Responsibilities:

- Involved in coding development and code maintenance.
- Designed the graphical user interface for newly introduced features.
